

SOP for Accessing JSW VPN (through CheckPoint Endpoint Client)

1. Download the VPN client.

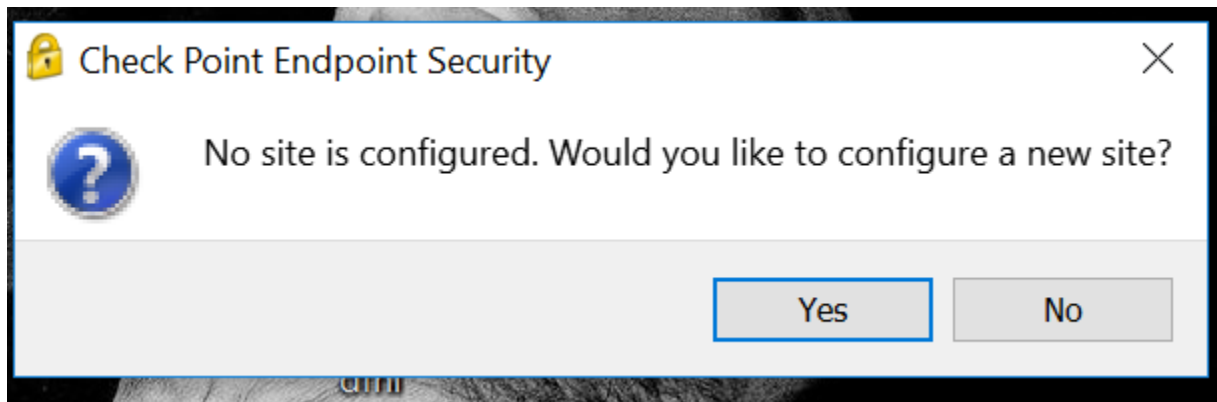

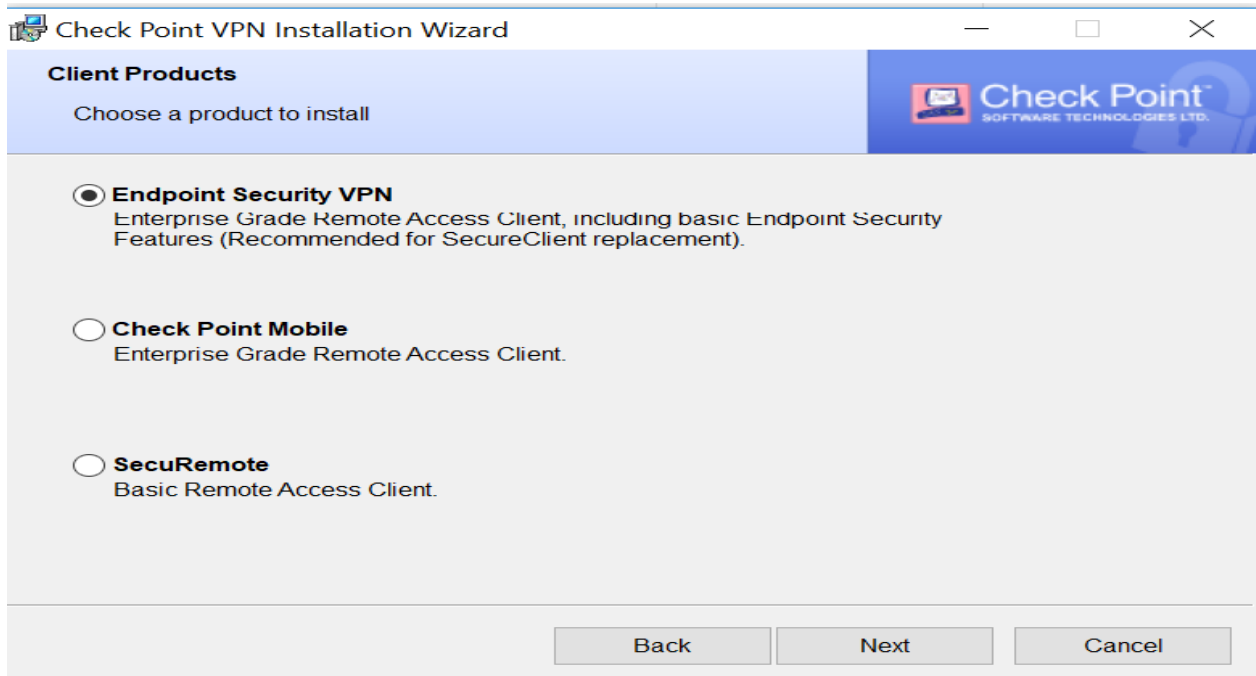

Windows

https://supportcenter.checkpoint.com/supportcenter/portal/role/supportcenterUser/page/default.psml/media-type/html?action=portlets.DCFileAction&eventSubmit_doGetdcdetails=&fileid=71467

MAC

https://supportcenter.checkpoint.com/supportcenter/portal/user/anon/page/default.psml/media-type/html?action=portlets.DCFileAction&eventSubmit_doGetdcdetails=&fileid=60048

2. Click on install. And select Endpoint Security VPN option.

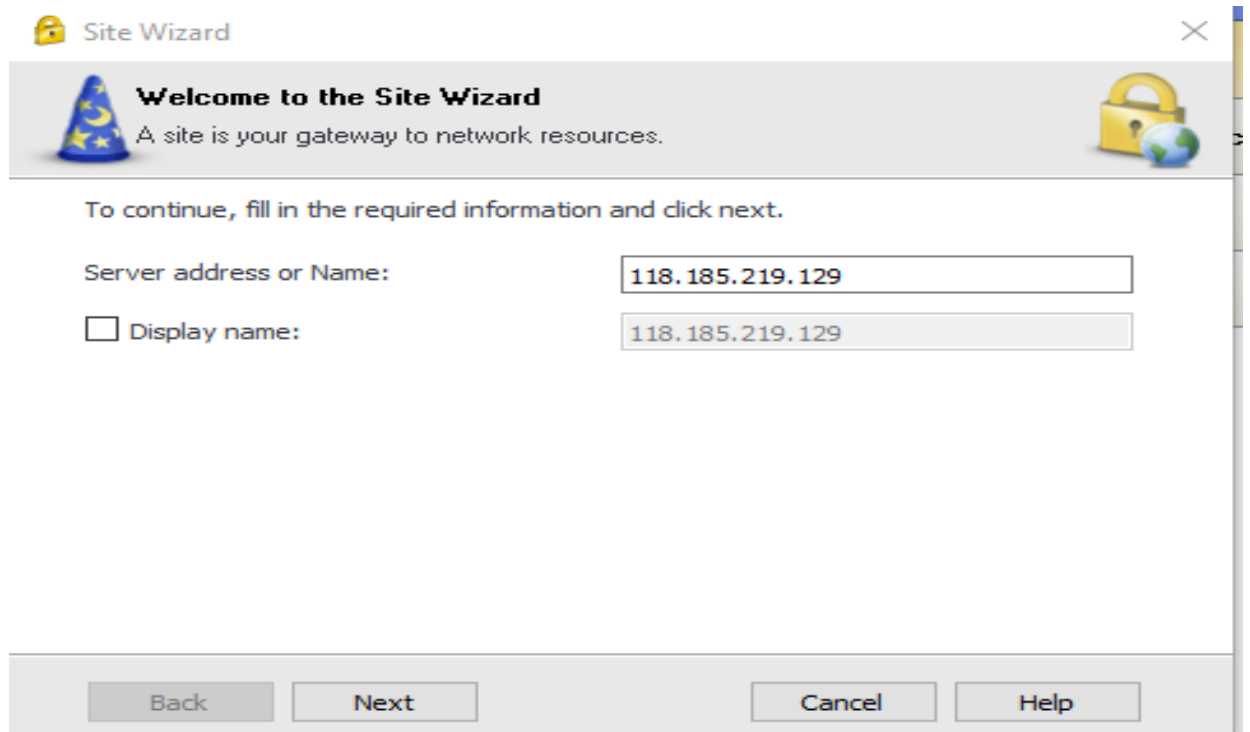

3. Agree the terms and condition and click on install.

4. Once successfully install please reboot the system.
5. After reboot, open the Checkpoint VPN client from Start menu
6. Click on **Connect** and **Create New Site**.

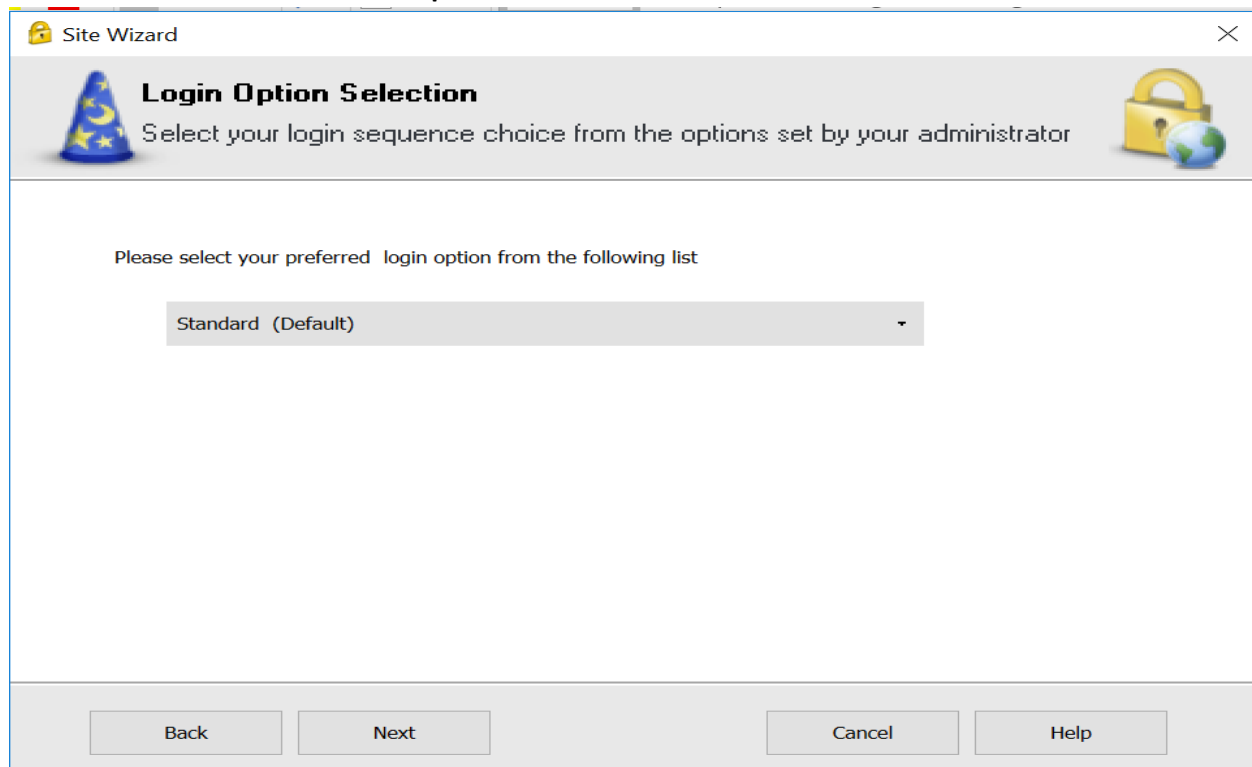

7. Enter the server address name as secureaccess.jsw.in if this does not connect can connect with IP address as **118.185.219.129 OR 125.17.161.68** and click on **Next**

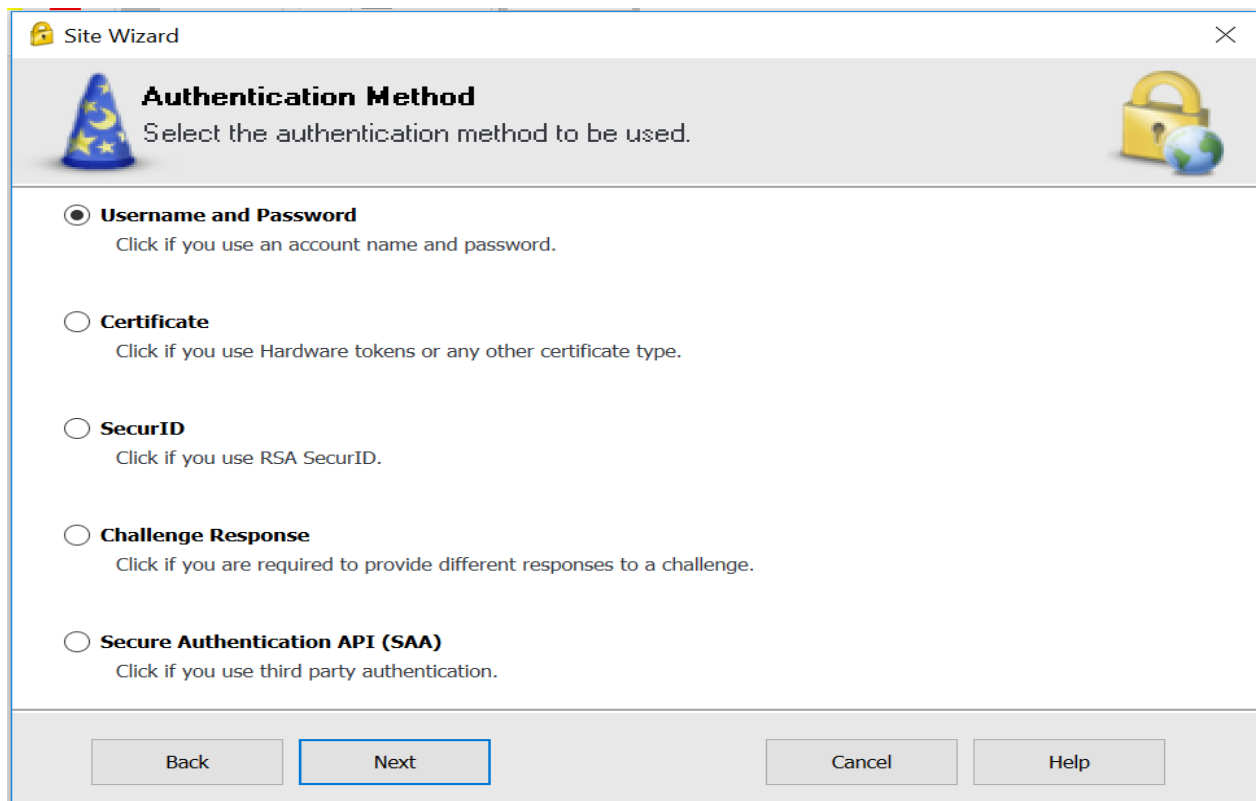

8. Click on **Trust and Continue**.

9. Click on **Standard default option** and click next

10. Choose **Username and Password** and click **Next** and **Finish**

The image shows a 'Site Wizard' dialog box with a title bar containing a lock icon and a close button. The main area has a header with a wizard hat icon, the title 'Authentication Method', and the instruction 'Select the authentication method to be used.' To the right of the header is a yellow padlock icon with a globe. Below the header, there are five radio button options, each with a description: 'Username and Password' (selected), 'Certificate', 'SecurID', 'Challenge Response', and 'Secure Authentication API (SAA)'. At the bottom, there are four buttons: 'Back', 'Next' (highlighted with a blue border), 'Cancel', and 'Help'.

Site Wizard
