Project

Mini Project:

Title	: Automated Door Opening and Closing Systems.
Duration	: 15 Days
Description	: This project proposes a system of automatic opening and closing of door by sensing any body movement near the door. This is achieved with help of a PIR (Passive Infrared) sensor. A live body generally emits infrared energy which is sensed by the PIR sensor from a considerable distance. This sensing signal is fed to a microcontroller to operate a door motor through motor driver IC

Title : Talking Robot
Duration : 10 Days
Description : This project proposes a system of automatic talking robot that welcomes the people nearing it. This achieved with the help of hay's bridge, premium voice recorder chip and an IR sensing unit. When this IR sensing unit senses the presence of one passing by it, the robot welcomes them.
